

OVERSUPPLY OF MILK.

Farmers About Watertown Have More Than They Require.

Watertown farmers say that the present milk surplus is the most troublesome and the largest they have ever experienced. Nearly all winter some of the dealers have been unable to find a market for all of the milk produced and the question how to use the surplus and hold the prices up is a difficult one for the Watertown Milk Producers' association. The situation will no doubt improve as soon as the cheese factory in Bethlehem is in full operation and the supply of milk from that part of Litchfield county diverted from the Watertown market. It is expected also that some of this surplus milk will be taken from here to Bethlehem. Some of the farmers have been making their surplus into butter, but there is a tendency among a few of the producers to force their surplus milk upon a crowded market which is likely to result in the price dropping. It is unusual to have a surplus in the winter months and it is claimed that the present one is due more to the falling off in the demand than to an overproduction.

The quartz lamp is the latest electric lighting apparatus. It is a mercury vapor lamp with a quartz tube in a glass globe and resembles an arc lamp in general appearance. It is to be used as a single lamp or 250 and has a rating of 2,000 candles, consuming 0.25 watt per candlepower. Its life is given at 1,000 hours, and an advantage claimed for it is that it is unnecessary to replace any electrodes.
